The death of Mr. Louis Christian Miller, Chief of the Section of Planting in District 2, which occurred at Denver, Colo., on July 16, following an operation for appendicitis, is announced with profound regret. Mr. Miller entered the Division of Forestry as a Student Assistant June 16, 1900, and became a Field Assistant November 1, 1903. Practically his whole service was spent in lines of work directly connected with forest extension, and at the time of his death he was a recognized expert in planting work. He was a member of the Society of American Foresters. He was highly esteemed as a man of character and ability, and his death is deeply mourned by his associates in the Forest Service.

With deep regret announcement is made of the death of Alexander A. Cummings, Forest Guard, on the Superior National Forest, who was drowned in Knife Lake, May 8; of Sidney E. Moyle, Assistant Forest Ranger, on the White River National Forest, at Meeker, Colo., June 15; of Henry C. Hinst, Deputy Forest Ranger, on the Sawtooth National Forest, at Hailey, Idaho, May 17; and of Frank P. Hill, Assistant Forest Ranger, on the Umpqua National Forest, at Roseburg, Oreg.

LAW.

UNITED STATES DEPARTMENT OF AGRICULTURE,

OFFICE OF THE SECRETARY,

Washington, D. C., June 9, 1910

GENERAL ORDER No. 140.

DUTIES OF THE SOLICITOR.

The Act of Congress approved May 26, 1910, contains the following provision:

"Hereafter the legal work of the Department of Agriculture shall be performed under the supervision and direction of the Solicitor."

To carry into effect this provision of law it is hereby ordered that the legal work of the various bureaus, offices, and divisions of this Department shall hereafter be conducted as follows:

* * * * *

4. *Forest Service*.—The legal work of the Forest Service shall be conducted in accordance with General Order No. 138, dated January 15, 1910, subject to the following change: On and after July 1, 1910, the positions of Law Officer, First Assistant Law Officer, and Assistant Law Officer, in Washington, will be discontinued, and the law work of the Forest Service in Washington will be performed under the immediate direction of the Solicitor.

GRAZING TRESPASS SETTLEMENT.—Payment of \$378 has been received from U. F. Diteman in settlement of grazing trespass (civil) by Diteman and Rennie on the Rainier National Forest. The trespassers were arraigned in the United States Court at North Yakima on May 17 on the indictment for criminal trespass and a demurrer was filed by their attorney. The court announced that he would enter an order sustaining the demurrer as soon as he could prepare his opinion.

ACCOUNTS

FORMS 861 AND 861-G REVISED.—Letters of transmittal, Forms 861 and 861-G, have been revised, the revised forms having a perforated coupon to be detached by the District Fiscal Agent and retained as a permanent record in his office. With the

exception of this perforation the form is practically unchanged, and its use, so far as Forest officers are concerned, will remain the same. The revised forms will be distributed as soon as received and should then be used exclusively by all Forest officers for transmitting collections on accounts of Forest resources. All old Forms 861 and 861-G on hand should be destroyed when the new edition is received.

REVISION OF PAY-ROLL FORMS—The Field pay roll, Form 2, has been revised and will now be used by Forest supervisors in certifying monthly salaries of the Forest force instead of Certificate of Service, Form 143. An initial supply will be furnished by the Property Clerk at Ogden without requisition. When that is received, the use of Form 143 should be discontinued. If a supply is not received within a reasonable time after July 1, the Property Clerk should be notified. In preparing the pay rolls three copies should be made—the original and one carbon forwarded to the District Fiscal Agent and the second carbon retained in the Forest file. The original pay roll only should be certified, but the carbons should show the name of the certifying officer.

TRANSPORTATION REQUESTS—Alterations or erasures on a transportation request should be made only by a person who has authority to issue the request. Allowance for extra services rendered in accordance with an unauthorized alteration of a request can not be made unless such services are specifically ratified and approved by proper authority. Additional accommodations required by an employee over those originally provided for him should be paid for by himself and reimbursement requested therefor; which can only be made after the same are furnished and are ratified and approved as necessary and required for the Government's interest. Decision by Comptroller, July 22, 1909.

OPERATION

CHANGES IN NATIONAL FOREST BOUNDARIES AND AREAS—Since the June issue of the Field Program the President has signed proclamations changing the areas and boundaries of certain National Forests as follows:

On May 27, San Isabel and Las Animas (District 2) eliminating 99,965 acres and consolidating both forests under the name of San Isabel; Wallowa (District 6), eliminating 203,635 acres and transferring 604 acres to Wenaha; Wenaha (District 6), transferring 604 acres from the Wallowa. June 7, Datal (District 3), eliminating 95,178 acres and adding 183,091 acres. June 8, Executive Order combining San Luis and Santa Barbara National Forests (District 5) under the name of Santa Barbara. June 9, proclamations eliminating 5,640 acres from the Cochetopa and 11,195 acres from the Gunnison (District 2). June 10, eliminating 45,489 acres from the Uncompahgre (District 2).

Other proclamations effective July 1 made the following changes: In District 1, 16,012 acres were eliminated from the Deerlodge (Montana) and 33,358 acres were transferred to the Beaverhead; 106,875 acres were eliminated from the Beaverhead (Idaho and Montana), 15,680 acres were transferred to the Targhee, 140,160 acres transferred to the Lemhi, and an addition of 33,358 acres made by transfer from the Deerlodge. In District 2, the Medicine Bow Forest became the Colorado, and

the name of the Cheyenne (Wyoming) was changed to Medicine Bow and 39,865 acres were eliminated. In District 3, the changes in the Chiricahua (Arizona and New Mexico) were: Additions, 30,560 acres; additions by transfer from the Coronado, 51,840 acres, and eliminations, 57,297 acres; in the Coconino (Arizona) additions, 28,775 acres, and eliminations, 283,344 acres. The Tusayan (Arizona), a new Forest, consists of 1,830,487 acres, of which 1,756,131 acres were formerly a part of the Coconino and 74,356 acres reserved by this proclamation. The changes in the Coronado were: Additions, 15,120 acres, and eliminations, 383,809 acres. The changes in the Manzano (New Mexico) were: Additions, 268,770 acres; transfer to the Zuni, 215,601 acres, and eliminations, 84,158 acres. The changes in the Zuni were: Additions, 126,001 acres, and eliminations, 5,219 acres. In District 4, 60,070 acres were eliminated from the Targhee (Idaho and Wyoming). A new Forest, the Palisade, was created by taking 583,650 acres from the former Targhee (Idaho and Wyoming). 15,122 acres were eliminated from the Nebo (Utah), and 54,240 acres transferred to the Wasatch. The Wasatch received an addition of 8,713 acres, and 1,440 acres were eliminated. In District 5, a new Forest called the Kern was created from 1,938,528 acres formerly a part of the Sequoia, together with 12,663 acres of newly reserved land. The Sequoia received an addition of 9,389 acres, and 175,730 acres by transfer from the Sierra, and lost 65,490 acres by elimination. In District 6, an addition of approximately 239,360 acres to the Chelan was made by transfer from the Wenatchee.

REQUISITIONS FOR FORM 979.—The supply of Form 979, Conventional Township Sketching Sheet, which hitherto had been furnished by the Property Clerk to District Headquarters only and distributed from there as needed on the National Forests, will hereafter be issued directly from the Supply Depot at Ogden to the supervisors' headquarters. Chiefs of Maintenance should, therefore, requisition only the number of copies needed at the district offices, and supervisors should requisition directly on the Supply Depot the number of copies necessary for their work.

SILVICULTURE

CORRECT PREPARATION OF PAPERS.—If the present plan of having supervisors prepare important papers in reference to timber sales, sawmills, etc., is to be successful, Forest officers must be careful to see that the blank space on the forms used are filled out properly and that the paper is in every respect correctly drafted before it is submitted for execution. Mistakes in respect to material language and terms can not be corrected after the execution of the papers, without destroying the validity of the contract or bond, as the case may be.

DUPLICATES OF LETTERS ON INSECT INFESTATION.—Letters dealing with diseases or insect infestation should be forwarded to the Forester in duplicate, in order that the copies may be transmitted either to the office of Forest Pathology or to the office of Insect Investigations, without additional copying in the Washington office. Much unnecessary typewriting will be avoided if this is done in all cases.

RECONNAISSANCE FORMS.—The present reconnaissance Forms 321, 322, and 323, have been revised as follows: Form 321 (book) has been discontinued and is superseded in part by Forms 321a ("Forty Estimate Sheet"), and 322, revised ("Recon-

naissance Section Plat"), both of which are loose sheets and are prepared for use in small valuation tally holders. Form 321a is for detailed tally by forties, together with descriptive notation. Form 322, instead of being an office form exclusively, has been rearranged so that by folding the form it is reduced to the same size as Form 321a and can be used in the same holder, thus making it available in part as a field form for mapping purposes. Form 323 remains the same in general arrangement, except that the scale has been changed to two inches to the mile, thus making it conform to the atlas scale.

GRAZING

IDENTIFICATION OF GRASSES AND FORAGE PLANTS—The Forester will be glad to have all Forest officers avail themselves fully of the services of the plant expert in the Washington office in identifying and classifying the various grasses and other forage plants found on the National Forests. It is evident, however, from the condition in which many of the specimens now reach the expert, that Forest officers are not taking sufficient pains in gathering and forwarding them. If the instructions contained in the circular of April 5, 1909, "Suggestions for the Collection of Range Plant Specimens," are carefully followed, so far as relates to the selection and handling of such specimens, much delay and disappointment will be saved.

LANDS

PROCEDURE IN THE CONDUCT OF CLAIMS CASES—The following agreement, to govern hearings and appeals in cases involving lands or claims within National Forests, was signed on June 25, 1910, by the Secretary of the Interior and by the Secretary of Agriculture:

To the Commissioner, Registers and Receivers, and Chiefs of Field Division, General Land Office, Department of the Interior; the Forester, District Foresters, and District Law Officers of the Department of Agriculture.

GENTLEMEN: To better effectuate cooperation in protecting the interest of the Government and settlers and other claimants for lands within National Forests, the following orders are effective:

1. Forest Supervisors will submit all reports made by forest officers to the District Forester, who, when satisfied with said reports, will transmit the same to the Secretary of Agriculture; the Secretary of Agriculture will forward such reports to the Secretary of the Interior. The Commissioner of the General Land Office will return said reports to the proper Chief of Field Division for notation upon his records and for his approval in the event he finds the same sufficient; and should the Chief of Field Division find such report insufficient to warrant proceedings to hearing or the taking of other appropriate action, he will return the same with indorsements, asking that the Department of Agriculture make such additional investigation as may be necessary, or in the event he deems it advisable he will cause an agent of the General Land Office to make such additional investigation.

2. Upon order or applications for hearings upon reports covering lands or claims within a National Forest, the Register and Receiver will send duplicate notices thereof to the Chief of Field Division and the District Law Officer. Before setting date for the hearing in any such case, the Chief of Field Division will confer with the proper District Law Officer and thereupon suggest to the Register and Receiver a date for hearing, and the names of witnesses to be subpoenaed upon behalf of the Government. In the event the Chief of Field Division and the District Law Officer

are unable to agree as to the date of hearing, the matter will be referred by the Chief of Field Division to the Commissioner of the General Land Office, who will give the necessary direction in the premises.

3. In all hearings affecting lands or claims within a National Forest, the Chief of Field Division or a special agent of the General Land Office, and the District Law Officer, or Assistant District Law Officer, will be entered of record as appearing on behalf of the Government. The Chief of Field Division or special agent acting as attorney for the Government in any such case will control the Government's side of the case in any matter as to which counsel are unable to agree, subject to any direction that may be given by the Commissioner of the General Land Office, in case the matters of difference are of such importance as to be presented to him for action.

4. In all Government cases before registers and receivers involving lands or claims within a National Forest the Chief of Field Division and the District Law Officer shall each be served with notice of all motions, orders, and decisions required to be noticed under the rules in cases of private contests. The proper law officers of the Department of Agriculture shall also have a right of appeal from any decision by the Commissioner of the General Land Office, and to file motion for review in the Department, or take other like action in the same manner as a private contestant, and shall receive like notices of proceedings and decisions.

5. Costs incident to hearings before registers and receivers in Government cases involving lands or claims within a National Forest will be paid under rules now in force. Expenses incident to appeals will be paid by the Department of Agriculture, except that, where feasible, Chiefs of Field Division may give aid in office work in preparation of papers, briefs, etc.

Very respectfully,

(Signed)

R. A. BALLINGER,
Secretary of the Interior.

(Signed)

JAMES WILSON,
Secretary of Agriculture.

On June 28 the following instructions for procedure in contested claims cases on National Forests, signed by the Forester and by the Solicitor, were approved by the Secretary of Agriculture:

To the District Foresters and District Law Officers:

1. It is not the purpose or intent of the Department to initiate contests against claimants who have entered lands in the National Forests in good faith to secure a home, or for other purposes recognized by law, and in such cases no contest should be initiated upon slight, technical non-compliance with the law. It is the purpose and intent, however, to protect the lands of the United States within the National Forests from acquisition by those who do not seek them for purposes recognized by law, and when it is apparent that an entry is not made or a claim initiated in good faith and in compliance with the spirit of the law under which the entry or claim is made, but is believed to be a subterfuge to acquire title to timber land, or to control water, a water-power site, or rights of way; or if it otherwise actively and materially interferes with the essential interests of the National Forest in that locality, a contest should be begun even if the technical requirements of the law appear to have been fulfilled. As to mining claims, it should especially be borne in mind that good faith almost necessarily exists when the claims are located on untimbered and unwatered lands which control no means of access or rights of way.

It is necessary that the officers of the Forest Service who make an examination of claims to lands in the National Forests carefully consider all the circumstances surrounding the claim to the end that the good faith of the claimant may be determined.

An adverse report on a claim should be so full and complete that the evidence when submitted to the Interior Department would *prima facie* warrant a cancellation of the entry.

2. When a thorough investigation of a claim has been made and the Supervisor decides that a contest should be initiated he will make a full report to the District Forester. If the District Forester approves the recommendation of the Supervisor he will refer the report to the District Law Office for consideration of the sufficiency of the evidence. If the District Law Officer is of the opinion that other and additional evidence is required, he will so advise the District Forester, who will take the necessary action to secure it. When the report is completed the District Forester will transmit it to the Forester, who will make his recommendation thereon and transmit all the papers to the Solicitor, who will make an examination of the case for the purpose of ascertaining the sufficiency of the law and evidence to sustain the contest and for the purpose of recommending to the Secretary the action to be taken thereon.

3. The reports of the Forest officers should be as full and complete as the facts of the case will permit and should include especially:

(a) A particular description of the land, its location, character, amount of timber, description of improvements; and if an agricultural claim, its accessibility as a home, extent and nature of cultivation each year, and periods of residence; if a mining claim, the nature and extent of work done, and, when the examination has been made by an expert miner, the nature and extent of mineral deposits.

(b) A digest of the testimony of witnesses and, where possible, the testimony of witnesses reduced to writing, signed, and verified by them.

(c) A full statement of the Forest officer showing facts in his knowledge and the sources from which derived. Facts, not opinion, are desired.

(d) A full statement of entryman or claimant should be procured if possible.

The foregoing specifications of evidence to be submitted are not exclusive of any other evidence pertinent and relevant to the case, the intent being that the report should be fair and sufficient in detail to enable the department to determine whether a contest should be initiated.

4. Upon the determination of the Secretary as to the action required he will advise the Secretary of the Interior, and if a contest is necessary, he will indicate the charges upon which a hearing is requested and will transmit the report of the Forest officer to him with the request that action be taken.

5. When the District Law Officer is notified by the Register and Receiver of an order or application for a hearing the Law Office will confer with the Chief of Field Division of the General Land Office for the purpose of fixing a date for hearing. The District Law Officer or his assistant will attend the hearing and assist the special agent of the General Land Office in the conduct of the hearing as directed by the joint order of the Secretary of Agriculture and the Secretary of the Interior of June 25. The District Law Officer will secure a copy of the testimony in each case at the expense of the Forest Service, will prepare a brief for the Department, which will be filed with the papers in the local Land Office and transmitted by the Register and Receiver to the Commissioner of the General Land Office, and a copy of the brief must be duly served on the claimant or his attorney by the Law Officer. The District Law Officer will send his copy of the testimony and a copy of the brief prepared by him to the

Solicitor of the Department of Agriculture for use in the event additional action is desired by the Solicitor before the Commissioner of the General Land Office and for use in the preparation of appeals, if any, from the decision of the Commissioner of the General Land Office.

SETTLERS ON RESTORED AREAS—The Secretary of the Interior decided, June 8, 1910, that persons who are occupying lands under special-use permits within that portion of the Montezuma National Forest recommended for elimination by proclamation and who continue to reside thereon to the time the lands are restored to settlement and entry, will be entitled to a preference right of entry by virtue of their settlement and residence. The lands involved have not yet been eliminated from the Forest, owing to the necessity of a resurvey of a private land claim embracing a portion of the lands involved. When they are restored they will be declared open to settlement upon a given date, and to entry, filing, and settlement at a date thirty days thereafter, thus affording the prospective homesteader and actual settler the advantage over others who may apply. Respecting the rights of persons who have merely applied for the listing of lands under the act of June 11, 1906, within that area to be eliminated, and who have not actually settled upon the land, the Interior Department declines to express an opinion as to any rights which they may have until an actual concrete case is presented for consideration.

EXAMINATIONS OF FOREST HOMESTEAD APPLICATIONS—Owing to the prime importance of this work, to the danger of inconsistent action, and to the difficulty of conveying by report a clear idea of the listability of lands in doubtful cases, it is advisable that only the more experienced and efficient Forest officers be assigned to the work. Supervisors are expected to give as much personal attention to this work as possible, so that reexaminations will not be necessary, because reports fail to represent the true conditions.
